FOR IMMEDIATE RELEASE

Bill Lickson Named Director of North Florida Innovation Labs

To Lead New \$17 Million Facility Under Development

TALLAHASSEE, FLORIDA – March 30, 2021 – Innovation Park of Tallahassee announced today that Bill Lickson will be its new Director of North Florida Innovation Labs which currently operates in the Collins Building in Innovation Park. A new \$17-million-dollar facility is in the development phase and is slated to open in 2023.

“We’re excited about Bill Lickson’s addition to the team at Innovation Park,” said Ron Miller, Executive Director. “Bill has been actively involved in startups for over a decade in our community and across the country, and most recently served as the Executive Director of Tallahassee business incubator Domi Station. His expertise and natural sense of collaboration, community, and team building within the entrepreneurial ecosystem will be critical as we build a world-class facility and programs within North Florida Innovation Labs at Innovation Park.” added Miller.

Lickson will lead the new state-of-the-art facility which will combine wet labs, dry labs, fabrication spaces, prototype development, and coworking for technology-based businesses. North Florida Innovation Labs will be unique in our region in its ability to help businesses bring needed technologies to the market.

“North Florida Innovation Labs will be one of the largest drivers of our regional economy for years to come. I am extremely honored, humbled, and excited about this opportunity to lead this initiative for our community,” said Lickson. “We will continue to collaborate with all of our great entrepreneurial ecosystem partners to maximize the economic impact of the amazing new asset for our region.”

About Innovation Park of Tallahassee

The mission of Innovation Park of Tallahassee, a 208-acre research park located in southwest Tallahassee, is to work in collaboration with local government, FSU, FAMU, and TCC to foster the startup, growth, and attraction of private companies that create high wage jobs and contribute to our region’s innovation ecosystem.
